PRIVATE CARAVAN SITE DEVELOPMENT CONSULTANCY

SOFT LANDSCAPING:

Overview:

Little relieves the bare functionality 'carp park' appearance of a Small Private Caravan Site more than some strategic soft landscape planting especially if carried out sympathetically with the surrounding environment.

Once established, soft landscape planting can provide:

- A welcoming vista to new and first time arrivals.
- Privacy both external and internal to the site.
- A perception of security.
- An every changing backcloth throughout the seasons against which visitors will pursue their chosen activities.
- Natural habitats for wildlife.

In simple layman terms it just looks 'nice'.

SOFT LANDSCAPING:

Soft Landscaping & Planting Generally:

The deployment of soft landscaping (flowers, trees and shrubs) can give a welcoming, homely feel to a Small Private Caravan Site setting a good first impression and a cordial agenda for the duration of it's visitors' stay.

- Screen Planting:

Strategic taller planting around the pitching area can provide a feeling of privacy and security from without.

SOFT LANDSCAPING:

Soft Landscaping & Planting Generally (Cont'd):

- Screen Planting (Cont'd):

The effect of screen planting can be enhanced if installed on top of a bund of spoil arising from any development engineering works. The extra elevation makes the planting more effective and, at the same time, avoids the cost for the removal of spoil off site.

SOFT LANDSCAPING:

Soft Landscaping & Planting Generally (Cont'd):

- Screen Planting (Cont'd):

Apart from security and privacy, hedge planting potentially provides:

- A natural break between the pitching area and it's immediate environs leaving visitors feeling less on public view, and
- An environmental habit for all the birds, bees and bugs upon which the balance of nature is so reliant.
